

U.S. Patent No. [5,308,605] 5,308,065 describes a casino table card game where a player, after making a wager, is dealt, face-up, a hand of five cards that is placed in a player-hand area. The player also receives a solitary card, which is dealt face down in a single-card area. The player then has a chance to improve the ranking of the five-card hand by discarding up to five cards and replacing them with an equal number of new cards. After the player rearranges the five-card hand, the solitary card is turned face-up and all the cards in the player's hand that have the same face value as the solitary card are designated wild. The ranking winnings are calculated according to a statistical pay table.
